Shannon Tower VCS SAT successfully passed

Comsuisse AG is proud to inform, that on December 1st, 2016, the Shannon Tower VCS has successfully passed SAT and commissioning and will go into operation in early 2017. The Irish Aviation Authority IAA is pleased, that an experienced technical support engineer from comsuisse AG enabled a smooth and successful SAT.

The installed Voice Communication System is based on the field proven ICS 200/60 platform from Schmid Telecom. It's fully redundant architecture supports best availability. comsuisse AG has the proven long-term knowledge and all rights to produce, deliver and maintain the ICS 200/60 from Schmid Telecom AG. The system as configured, has passed all Site Acceptance Tests (SAT) without any outstanding deficiency.

Mr. Peter Nolan states: "We at IAA are glad, that comsuisse AG a company with a proven knowledge of the ICS 200/60 voice communication systems has entered the market. The support by a crew of experienced application engineers, as well as the good relation to the management of comsuisse AG facilitated the successful completion the Shannon Tower VCS. SAT "

About comsuisse AG:

comsuisse AG, a company for safety critical, high reliable voice communication solutions combines a crew of engineers with long-term experience in the area of TDM based ICS 200/60 systems with the knowledge of most modern VoIP technology. Together with its sister companies Schmid Telecom Beijing Ltd, Schmid Telecom India Ltd, Schmid Telecom Russia Ltd and Schmid Telecom Singapore Pte Ltd, comsuisse AG is not only enabled to support ICS 200/60 voice communication systems, but also to adapt, produce and provide long-term maintenance for customers operating ICS 200/60 systems.
